

## WARNING

Proper operation of your brakes is essential for your safety and the safety of others. Any brake service should be performed ONLY by persons experienced in the installation and proper operation of brake systems. It is the responsibility of the person installing any brake component or kit to determine the suitability of the component or kit for the particular application. After installation and before operating your vehicle, be sure to test the function of the brakes under controlled conditions.

# VL3526 INSTALLATION

The VL3526 metering valve is intended to be installed into the front disc brake portion of a disc / drum system. This valve will slightly dampen down the application of the front disc brakes in a panic stop situation so the slower reacting drum brakes can catch up. This action will eliminate "nose dive".
